# **The Clackmannanshire Access Forum**

## Minute of meeting held on Tuesday, 18th January 2011 at Kilncraigs

	Action
Present	
Landowners/Land Managers: James Cullens, Sir Robert Stewart	
User group representatives: Gordon Durward, Linda Howson,	
Jane Preston, Colin Thomson	
Community group representatives: Caroline Crawford (Chair),	
David Scott, Alistair Scott (substitute for Enid Trevett)	
Agency and advisory representatives: Alistair Lawson, Jane	
McArdle	
Council: Ronnie Beveridge, Helen Blenkharn, Martin Dean, Euan	
Hills, David Thomson	
Visitors: Peter Leslie	
1.0 Apologies	
<b>1.1</b> Apologies were received from:	
- Brian Poett	
- Enid Tevett	
- Niall Urquhart	
- Colin Ward	
2.0 Approval of draft minute of meeting held on 13th	
September 2010	
<b>2.1</b> David S proposed that the minutes of 13th September 2010	

were approved. This was seconded by Sir Robert.	
3.0 Matters arising from meeting on 13th September 2010	
3.1 Clackmannanshire Alliance Martin reported that	
diagrammatic information about the Clackmannanshire Alliance had been forwarded to Forum members.	
<b>3.2 Devon Way</b> Martin reported that Brian had e mailed him to say	
"I was a little concerned about the horses slipping and	
asked a contact in the Household Cavalry how they coped with	
slippery roads in London. The answer was that they use perfectly	
normal shoes on the ordinary tarmac roads."	
Some concerns were raised about the resources that were being	
diverted towards horse riders who, it was argued, represented a	
small number of path users.	
Martin stated that the Land Reform (Scotland) Act 2003 gave	
horse riders a right of access.	
Linda mentioned that in some areas, notably near the Devon Way,	
there were a significant number of equestrian users and that	
Clackmannanshire Riders Access Group (CRAG) had undertaken	
a number of path improvements in Clackmannanshire that	
benefitted all users.	
Martin agreed to walk the Devon Way with representatives of the horse riders to see what measures could be made to address the	
issue of slipping that some horses shoes have had on tarmac.	MD/LH/JP
3.3 Signs and gates Martin reported that he had met with James	WID/LII/31
and that several self closing gates had been installed on his land.	
He also said that he had still to meet with Brian.	
Martin also reported that Brian had e mailed him to say " I was told	
that a gate was left open towards the end of last year on	
the B 9140, and that a number of horses/ponies escaped resulting	
in the death of one and injury to at least one other. We have	
discussed the problem of locked gates in the past. I think that this	
highlights an anomaly in the Access legislation. As land managers,	
we have a duty of care to the general public, and in this instance	
the motoring public to keep our livestock off the roads where	
possible. Without locking gates, it is not easy to try to ensure this.  Does any one have a better way?"	
3.4 Diversion of core path 59 at Tillicoultry Golf Course Martin	
reported that Scottish Ministers have now been informed of the	
diversion.	
3.5 Ochils Landscape Partnership update Martin advised that	
there should be scope for Gordon to assist with implementation of	
the projects and that the opportunities for him would become	
clearer once the Co-ordinator had been appointed.	
3.6 Scottish Outdoor Access Code - Enjoy Scotland's	
Outdoors Martin reported that Mirren Begbie had commented that	<u> </u>

9.3 of the minutes should read "There then followed some	
discussion about fouling of paths by dogs and horses. Mirren	
asked what the Forum could do to encourage dog and horse	
owners to be more responsible with regard to dog and horse	
fouling, and also pointed out that the horse fouling is a	
considerable problem for walkers on paths in the Fishcross area.	
The Forum then went on to discuss irresponsible dog owners.	
Mirren highlighted the fact that some dog owners bag their dog's	
waste, but don't dispose of it responsibly."	
The Forum agreed that the above was an accurate representation of what was said.	
There then followed some discussion about dog and horse fouling	
when it was pointed out that there is legislation which requires	
owners of dogs to clean up after they have fouled, but there was	
no legislation requiring the same of horse owners. It was also	
pointed out that dog faeces is more harmful to humans than horse	
dung.	
3.7 Gartmorn Dam Green Hub Gordon advised that he hadn't	
heard anything about the Gartmorn Dam Green Hub. Martin	MD
agreed to investigate further.	MD
3.8 Environment Partnership Team Jane said that she is	
interested in participating in meetings and would like more	145
information about the Environment Partnership Team.	MD
3.9 SRPBA and NFU Scotland Joint Briefing Note on Outdoor	
Access in Fields with Cattle; Guidance for Land Managers	
Martin reported that he had circulated the Joint Briefing Note to	
· ·	
Forum members.

- What's going on in Falkirk
- Providing for access in Callander Estate in Falkirk
- **4.3** The afternoon was given over to workshops, which considered:
  - Access with dogs managing to reduce conflict
  - Shared use of inland water
  - Life after core paths the future role and priorities of local access forums
  - Making it happen future funding for access provision and management
- **4.4** Caroline concluded by saying that the joint meeting had been worthwhile and that topics for future discussion might include:
  - Access and cattle
  - Commercial dog walking

### 5.0 Update - Access and Countryside Projects Officer

### **5.1 Path improvements:**

- NCN at Mary Wood Martin reported that this section had now been tarred.
- NCN at Cambus Martin circulated plans showing what is proposed and reported that these were acceptable to the landowner and the tenant farmer.
- Menstrie Branch Line Martin reported that the sleepers and track had recently been lifted from the line south of the River Devon and that work was currently underway to lift the sleepers and track to the north of the river.
- WIAT Arnsbrae and Gean Wood Martin reported that the Council had been awarded WIAT funding to undertake works at Arnsbrae and at Gean Wood and that path improvements were due to take place on both sites.
- **Devon Way Marchglen to Tillicoultry** Martin reported that this section is due to be tarred see 3.2 above.
- **Devon Way Tillicoultry to Dollar** Martin advised that this path is to be widened and dressed with type 1/whin dust and that overhanging vegetation is to be cut back.

#### 5.2 SNH initiatives:

- Long Distance Routes Martin reported that Scottish Natural Heritage had identified criteria for Long Distance Routes and that one of these was that routes should be at least 25 miles long. This means that routes that are solely within Clackmannanshire are likely to be too short to qualify. Routes that pass through Clackmannanshire however, like the Round The Forth route, are likely to meet that particular criterion.
- Coast to Coast route/John Muir Way Martin circulated SNH's proposals for the Coast to Coast route a route from Iona to St Andrews. The preferred route passes to the north of Clackmannanshire, but some of the alternative options do pass

through the county.
Martin also mentioned the John Muir Way, a Central Scotland
Green Network project, which would also link the east and west
coasts. Initial proposals are that the route would go from the
Forth (Dunbar) to the Clyde.
5.3 Inclusive networks + phototrails Martin reported that the
Inclusive Networks project with Fleldfare and Fife, Stirling and
Falkirk Councils, had led to 2 more phototrails:
Cambus - Alloa
Alloa - Clackmannan
Phototrails is a website which allows disabled users, and others,
to assess whether a path is suitable for their needs.
5.4 Health Walks Martin reported that he represents the Council
on the strategic (health walks) group and that Euan represents
the Council on the operational group, and that the health walks
are proving very popular.
5.5 Events Martin reported that he had communicated with the
organisers of some events (in this case the Run of the Mill and
The Law Breaker hill races) in the Ochils, advising them of land
owners, the risk of rockfall in Tillicoultry Glen etc.
5.6 Planning responses  Clanachil Martin reported that the pricen's perimeter force
- Glenochil Martin reported that the prison's perimeter fence
had recently been improved and that he had been liaising with
the developers to ensure that core path 44 is re-instated to an
acceptable standard.
- Burnfoot Hill Wind Farm Martin reported that self closing
gates were due to be installed adjacent to the farm gates on the
track from Rhodders Farm to Alva Moss.
5.7 Tourism
- Visitor information 2011 Martin reported that Carolyn
McGill, Policy Officer for Clackamannanshire Council is producing
2 copies of an Outdoor Guide in 2011 and that the first of these is
due to be published in March. He mentioned that outdoor access
would be promoted in the guide and that it would also publicise
the Scottish Outdoor Access code.
5.8 Awareness raising
- OEWG presentation Martin reported that he had recently
publicised the Land Reform (Scotland) Act 2003, the Scottish
Outdoor Access Code and the Core Paths Plan to
Clackmannanshire Council's Outdoor Education Working Group.
5.9 Strategy and SEA Martin reported that he had made little
progress with the Outdoor Access strategy and it's Strategic
Environmental Assessment.
6.0 Update - Core Paths Plan implementation
<b>6.1</b> Martin reported that circa 60 signs had now been installed and

that labels which detail destination and distance were being	
ordered. He said that 2 way marking signs (which help direct those	
following a core path) had also been installed and that 7 self	
closing gates had been installed.	
7.0 Update - Devon Way projects (Peter Leslie)	
<b>7.1</b> Peter informed the Forum that he works for Cycling Scotland.	
He said that the Scottish Government had a target that by 2020	
10% of all journeys will be by bike. He also said that shared path	
use often caused conflict.	
7.2 Peter reported that Cycling Scotland, Clackmannanshire	
Council, Paths For All and Sustrans had formed a partnership to	
develop a Demonstration Project which aims to address the	
conflict and to demonstrate good practice.	
7.3 A section of the Devon Way between Fishcross and Marchglen	
has been chosen for the Project.	
<b>7.4</b> The project will comprise of 4 different surface types:	
Tar with rubber underneath	
Type 1 and whin dust	
Toptrec	
2 parallel paths of tar and type 1/whin dust	
7.5 Peter reported that some of the path surfaces would use	
recycled materials. The rubber would be sourced from recycled	
tyres and the toptrec is made from road planings.	
7.6 Peter also advised the Forum that the recent bad weather had	
delayed the start date of the works, but that they should be	
undertaken in the next few months.	
8.0 Update - Ochils Landscape Partnership (Helen Blenkharn)	
<b>8.1</b> Helen reported that the Heritage Lottery Fund (HLF) had	
approved funding the Ochils Landscape partnership and that a	
"start-up" meeting had been held between representatives of the	
Partnership and the HLF in November.	
<b>8.2</b> Helen informed the Forum that 2 task groups had been formed	
- a Project Delivery Task Group and a Learning and Participation	
Task Group.	
8.3 The Project Delivery Task Group have been prioritising	
projects and the Learning and Participation Task Group have been	
developing a training and volunteering schedule.	
<b>8.4</b> Helen advised that the next steps for the Council are to:	
sign the constitution	
recruit staff	
source further funding	
9.0 Update - Open Space Framework (Helen Blenkharn) and	

Local Davolanment Plan (Pannia Pavaridae)	
Local Development Plan (Ronnie Beveridge)	
<b>9.1</b> Helen advised the Forum that the Council has published an Open Space Framework for consultation.	
<b>9.2</b> She said that open spaces perform many roles or 'functions',	
and the majority of spaces have more than one function, including:	
Formal sport and leisure	
Informal recreation	
Active travel	
Improving wellbeing	
Amenity	
Biodiversity	
Water and flood management	
Green belt	
Climate change mitigation	
Climate change adaptation	
Education	
Meeting places/ event spaces	
9.3 Helen advised that the Open Space Framework is linked with	
the Main Issues Report, which is the first stage in preparing a	
Local Development Plan for the County. The Local Development	
Plan will set out policies relating to land use in Clackmannanshire	
over the next 20 years.	
9.4 The Framework aims to:	
Ensure a coordinated approach to the protection and	
development of Clackmannanshire's open space	
Inform land-use planning decisions on the provision of open	
space	
Encourage residents to lead healthier and more active	
lifestyles by providing a range of accessible open spaces for	
sport and leisure	
<ul> <li>Promote wellbeing by providing spaces in which people can</li> </ul>	
relax and enjoy being outdoors	
Make Clackmannanshire an attractive place to live, work	
and visit	
Improve biodiversity in Clackmannanshire by identifying	
areas where there are opportunities to strengthen and	
recreate habitat networks	
9.5 Helen informed the Forum that consultation on the Framework	
would take place from Monday, 10th January to Friday, 11th March	
2011. She also advised that more information on the Open Space	
Framework can be found on Clacksweb where questionnaires can	
be completed online.	
9.6 Local Development Plan Ronnie advised the Forum that	
Clackmannanshire is not within a city region planning area, so the	
current Structure and Local Plans will be replaced by one Plan, the	

	1
Local Development Plan.	
<b>9.7</b> He said that the Local Development Plan will set out policies relating to land use in Clackmannanshire over the next 20 years.	
<b>9.8</b> Ronnie reported that Clackmannanshire Council has produced a Main Issues Report as required by the Planning etc (Scotland) Act 2006, and that this is a first stage in preparing the Local Development Plan.	
<b>9.9</b> He advised that consultation on the Main Issues Report would take place together with the Open Space Framework and would consist of interactive and drop-in events in communities from 10th January to 2nd March. Details of these events, the documents themselves and online response forms are available on Clacksweb.	
9.10 Ronnie invited Forum members to attend the stakeholder workshops, and suggested that the Natural Environment and the Housing, infrastructure and connectivity workshops would be of particular relevance. Any Forum member wishing to attend these workshops should inform Ronnie on 01259 452613 or rbeveridge@clacks.gov.uk	
<b>9.11</b> Ronnie advised that the consultation closing date is 11th March.	
40.0 Undete Tilliagultry Clan (Evan Hilla)	
10.0 Update - Tillicoultry Glen (Euan Hills)  10.1 Euan reported that consultants had been appointed to assess the risks in Alva and Tillicoultry Glens, and that a high risk of major rockfall had been identified at one point in Tillicoultry Glen.	
<b>10.2</b> He reported that the consultants estimated that the cost of stabilising the rock would be £95,000.	
<b>10.3</b> Euan reported that a Working Group comprising Martin, himself, Sarah Robertson (Health and Safety Adviser) and David Thomson (Solicitor), had been established to consider the consultants findings.	
10.4 The Working Group agreed (after consultation with the Health and Safety Executive and consideration of relevant guidance and good practice) that signage which warns users of the risk of rockfall should be posted at the top and bottom of the glen, and that a safe alternative route on the east side of the glen should be highlighted for those not wanting to expose themselves to the risk.	
10.5 Euan advised that the signage is inspected at regular intervals and that local Councillors, Tillicoultry Community Council, the Access Forum and local groups have been advised of the actions taken. He also reported that land ownership is being investigated.	
10.5 Some members of the Forum expressed the view that warning signage is insufficient and that not everybody reads, or can read, signs.	

reassess the risk and, if necessary, identify costed solutions.  10.7 Euan advised that the position regarding access in the glen would be reassessed once the contractors had completed their work.  11.0 Advice required - Diversion of core path 72 at Devon Village  11.1 Martin presented a paper on the diversion of core path 72.  11.2 Proposed diversion of core path72 at Devon Village:  i. The proposed diversion route connects with core path 78 at Devon Village. This provides a link to core path 70 - the Devon Way. If going from Blackfaulds to the Devon Way, near Devon Village, the proposed diversion is the same distance.  ii. Surface is type 1 with whin dust. Minor surface improvements are proposed.  iii. The proposed route is narrower than the road, but is, at 2.5m - 3.0m wide ample width for access takers.  iv. There is one gate on the proposed route which will be replaced with a self closing gate. There is a small, but short, climb at the east end of the proposed route. Crossing the A908 is, because of a Pegasus crossing, easier and safer on the proposed route when compared with the original route.  v. Enjoyment should be enhanced because the proposed route is off road.  vi. I am assured this condition will be met.  11.3 One (of the two) landowners is supportive of the change. The views of the other landowner and Scottish Natural Heritage still require to be sought. It is not possible to get the views of a Community Council as there isn't one in the area concerned.  MD  11.4 The Forum is invited to discuss the proposed diversion is safer. It was also suggested that, in future, for the Forum to consider proposed diversions it is necessary to be familiar with the route/have had a site visit.  11.6 The Forum commented that their advice to the Council is to accept the proposed diversion to core path 72 at Devon Village.  12.0 Feedback - Forum members  12.1 Lack of time prevented this item from being discussed.	Terr zack or time provented time kern from zering discussed.	
reassess the risk and, if necessary, identify costed solutions.  10.7 Euan advised that the position regarding access in the glen would be reassessed once the contractors had completed their work.  11.0 Advice required - Diversion of core path 72 at Devon Village  11.1 Martin presented a paper on the diversion of core path 72.  11.2 Proposed diversion of core path72 at Devon Village: i. The proposed diversion route connects with core path 78 at Devon Village. This provides a link to core path 70 - the Devon Way. If going from Blackfaulds to the Devon Way, near Devon Village, the proposed diversion is the same distance. ii. Surface is type 1 with whin dust. Minor surface improvements are proposed. iii. The proposed route is narrower than the road, but is, at 2.5m - 3.0m wide ample width for access takers. iv. There is one gate on the proposed route which will be replaced with a self closing gate. There is a small, but short, climb at the east end of the proposed route. Crossing the A908 is, because of a Pegasus crossing, easier and safer on the proposed route when compared with the original route. v. Enjoyment should be enhanced because the proposed route is off road. vi. I am assured this condition will be met.  11.3 One (of the two) landowners is supportive of the change. The views of the other landowner and Scottish Natural Heritage still require to be sought. It is not possible to get the views of a Community Council as there isn't one in the area concerned.  MD  11.4 The Forum is invited to discuss the proposed diversion. 11.5 Comment was made that the proposed diversion is safer. It was also suggested that, in future, for the Forum to consider proposed diversions it is necessary to be familiar with the route/have had a site visit.  11.6 The Forum commented that their advice to the Council is to accept the proposed diversion to core path 72 at Devon Village.	13.0 Any other business 13.1 Lack of time prevented this item from being discussed.	
reassess the risk and, if necessary, identify costed solutions.  10.7 Euan advised that the position regarding access in the glen would be reassessed once the contractors had completed their work.  11.0 Advice required - Diversion of core path 72 at Devon Village  11.1 Martin presented a paper on the diversion of core path 72.  11.2 Proposed diversion of core path 72 at Devon Village:  i. MD  11.4 The Forum is invited to discuss the proposed diversion is safer. It was also suggested that, in future, for the Forum to consider proposed diversions it is necessary to be familiar with the route/have had a site visit.	12.0 Feedback - Forum members	
reassess the risk and, if necessary, identify costed solutions.  10.7 Euan advised that the position regarding access in the glen would be reassessed once the contractors had completed their work.  11.0 Advice required - Diversion of core path 72 at Devon Village 11.1 Martin presented a paper on the diversion of core path 72.  11.2 Proposed diversion of core path72 at Devon Village: i. The proposed diversion route connects with core path 78 at Devon Village. This provides a link to core path 70 - the Devon Way. If going from Blackfaulds to the Devon Way, near Devon Village, the proposed diversion is the same distance. ii. Surface is type 1 with whin dust. Minor surface improvements are proposed. iii. The proposed route is narrower than the road, but is, at 2.5m - 3.0m wide ample width for access takers. iv. There is one gate on the proposed route which will be replaced with a self closing gate. There is a small, but short, climb at the east end of the proposed route. Crossing the A908 is, because of a Pegasus crossing, easier and safer on the proposed route when compared with the original route. v. Enjoyment should be enhanced because the proposed route is off road. vi. I am assured this condition will be met.  11.3 One (of the two) landowners is supportive of the change. The views of the other landowner and Scottish Natural Heritage still require to be sought. It is not possible to get the views of a Community Council as there isn't one in the area concerned.  MD  11.4 The Forum is invited to discuss the proposed diversion is safer. It was also suggested that, in future, for the Forum to consider proposed diversions it is necessary to be familiar with the route/have had a site visit.
