

New Street Lighting for Clackmannan

Why is the Council changing the street lights?

The street lights currently in place use a lot of energy and much of the light is sent out into the sky and peoples' property rather than onto the roads and footpaths. The new lights use up to 60% less energy, concentrate the light where it is needed and help the Council to meet the government's climate change agenda.

When will work start installing the new lights?

Work will start in January 2015 and is scheduled for completion by the end of March 2015.

What are the advantages of LED street lighting?

- ✓ Lower energy costs
- ✓ Long lasting lamps
- ✓ Reduced glare
- ✓ Lower maintenance
- ✓ Instant light up (no warm up time)
- ✓ Improved lighting

Where can I see these new lights?

If you are interested in seeing the new LED lights in operation, you can visit Branshill Park or The Hennings in Sauchie where we installed new lights in 2013.

New LED street lights being installed

**Clackmannanshire
Council**
