### 1.1 Background to the survey

The building standards system in Scotland was established under the Building (Scotland) Act 2003. The Act gives powers to Scottish Ministers to make building regulations, procedure regulations, fees regulations and other supporting legislation as necessary to fulfil the purposes of the Act. The purposes include setting building standards and dealing with dangerous and defective buildings.

The remit of the building standards system is to protect the public interest by setting out the standards to be met when building or conversion work takes place, to the extent necessary to meet the building regulations.

The standards are intended to:

- Secure the health, safety, welfare and convenience of persons in or about buildings and of others who may be affected by buildings or matters connected with buildings;
- Further the conservation of fuel and power; and
- Further the achievement of sustainable development.

The role of the building standards verifier is to protect the public interest by:

- Providing an independent check of applications for building warrants to construct buildings, provide services, fittings or equipment in buildings, or to convert buildings;
- Granting or refusing building warrants;
- Carrying out an independent check of construction activities through the process of reasonable inquiry; and
- Accepting or rejecting completion certificates.

Verifiers are appointed by Scottish Ministers and the Act provides for a variety of verifiers should they be required. At present, the only appointed verifiers are the 32 Scottish local authorities, each covering their own geographical area.

In 2011 Pye Tait Consulting, on behalf of the Scottish Government, developed a set of nine national Key Performance Outcomes (KPOs), which were implemented as part of the *Building Standards Verification Performance Framework* and launched on 1<sup>st</sup> May 2012. The intention of these was, through more accurate and effective comparisons, to ensure consistency and quality in terms of outputs and overall service, along with a greater focus on peer review, benchmarking and sharing of best practice. Additionally, the KPOs underpinned a strong culture of continuous improvement.

In 2013/14 the Scottish Government commissioned Pye Tait Consulting to develop and run the first national customer satisfaction survey for building standards. This was predicated on the need to obtain nationally consistent data on customer perceptions of their local authority building standards service. The first survey provided baseline data for trend analysis in subsequent years and was repeated in 2015, 2016, 2017<sup>1</sup> and now in 2018.

### 1.2 Changes from May 2017

In 2015, the Scottish Government commissioned Pye Tait Consulting to evaluate the performance of local authorities in their role as verifiers<sup>2</sup>, with an aim to inform Scottish Ministers in the lead-up to the next appointment of verifiers from May 2017. The evaluation identified various considerations including the scope for a review and refresh of the performance framework.

In 2016, the Scottish Government completed this review in consultation with Local Authority Building Standards Scotland (LABSS) and with independent input from Pye Tait Consulting. The 32 local authorities were re-appointed on 1<sup>st</sup> May 2017 for varying lengths of time based on performance to date (17 local authorities for six years; 12 local authorities for three years; and three local authorities for one year)<sup>3</sup>. These are set for review in 2019. The new *Building Standards Performance Framework for Verifiers* was also implemented from May 2017<sup>4</sup>.

Two of the seven new KPOs, categorised under 'Quality Customer Experience', aim to ensure that verifiers adhere to the commitments in the building standards customer charter and meet or exceed customer expectations. The 2018 survey aligns with KPO4 – titled *Understand and respond to the customer experience*. The

purpose of this KPO is for local authority verifiers to monitor customer satisfaction with the building standards service and ensure it meets or exceeds customer expectations.

The Scottish Government Building Standards Division, in support of the Ministerial Working Group, recently consulted on making Scotland's buildings safer for people. The consultation sought to obtain stakeholder views and opinions two areas of consultation:

- Reshaping the system including roles and responsibilities of verifiers, strengthening enforcement and ensuring compliance.
- Fire safety standards relating to external cladding and cavities, means of escape, automatic fire suppression systems and fire engineered solutions.

The aim of which was to help ensure the safety of people in and around Scotland's buildings.

### 1.3 Survey methodology

The 2018 survey questionnaire replicated the 2017 version (a copy is presented in Appendix 2).

The scope of the survey was all building standards customers from 1<sup>st</sup> April 2017, defined as:

- a. Applicants for building warrants (including any agents);
- b. Submitters of completion certificates (including any agents); and
- c. Others that have interacted with the Building Standards service.

Local authorities sought consent from their customers to share their contact details (name and email address only) with Pye Tait Consulting for the express purpose of being invited to participate in the survey.

To obtain customer consent, local authorities incorporated a Privacy Notice as part of the Application for Building Warrant/Completion Certificate forms, and/or contacted their customers by email to provide the opportunity to opt out prior to their contact details being shared with Pye Tait Consulting.

The survey opened on 1<sup>st</sup> October 2018 and closed on 2<sup>nd</sup> November 2018. It was hosted online and customers with email addresses were directly invited by Pye Tait Consulting to participate. Local authorities were at liberty to promote the survey link to their own customers (i.e. those within scope) as appropriate.

When completing the survey, customers were asked to select the local authority to which their response related. Customers of multiple local authorities were invited to complete the survey more than once, as applicable.

### 1.4 Presentation of results

Customer satisfaction survey reports have been produced at the national (Scotland) level and for all individual local authorities in Scotland.

This report presents the findings for customers of Clackmannanshire Council.

The findings are anonymous and based on the perceptions of customers responding to the survey. They provide an indication of possible strengths and weaknesses in customer service although they do not explore the extent to which any particular issues may be within or outside of local authority control.

The results have not been subject to statistical tests to determine the significance of any apparent patterns and should therefore be treated with caution.

Percentages shown in charts may not add up to precisely 100% due to the impact of rounding.

The following colour key applies to Tables 2 to 4.

Colour key	Numerical rating questions	Percentage questions
Green	Higher than previous year	Higher than previous year
Amber	Between 0.1 and 1.0 lower than previous	Up to 10% lower than previous year

Red	More than 1.0 lower than previous year	More than 10% lower than previous
		year

### 2.1 Total survey responses

Total survey responses for Clackmannanshire is shown in Table 1. This includes a comparison between the response rate for Clackmannanshire and the national (Scotland-wide) response rate.

# Appendix 1: National Survey Questionnaire

# 2018 Customer Satisfaction Survey for Building Standards *Please tell us what you think*

#### Introduction

The Scottish Government (Building Standards Division) would like to obtain your views and feedback about the local authority Building Standards service in Scotland. This is a national survey that is being administered separately to customer feedback questionnaires issued by individual local authorities.

As a Building Standards customer since April 2017, we would like to hear about the quality of service you have received, for example when applying for a building warrant and/or submitting a completion certificate. We are interested in your views on the customer service you have experienced as opposed to the actual decision made in response to an application.

### How to complete the survey

You will be asked to identify which local authority your feedback relates to. If you have been a customer of more than one local authority and would like to provide additional feedback, please complete a separate survey.

The survey should take approximately 10 minutes to complete (this may take a little longer depending on how much feedback you wish to give). Please note, the final question asks you for any additional comments or feedback not covered by the previous questions.

As you progress through the survey, you will only be presented with those questions that are relevant to you. If you are unable to answer any questions, or if you feel they are not applicable, please leave them blank.

### Reassurance

Pye Tait Consulting is carrying out this survey independently on behalf of the Scottish Government and all 32 local authorities in Scotland.

The findings from the survey will be treated confidentially and reported anonymously by Pye Tait Consulting under the Data Protection Act 1988 and the Market Research Society (MRS) Code of Conduct.

If you have any queries, please contact Mark Tyler at Pye Tait Consulting via m.tyler@pyetait.com or by telephoning 01423 509433

Thank you for taking the time to complete this online survey.

## **Appendix 2: Survey Invitation Email**

Email subject: Building Standards in Scotland – Customer Feedback Questionnaire

Dear {Name}

We are writing to you as a customer of the local authority Building Standards service in Scotland.

This means that since 1st April 2017 you may have submitted a building warrant application, completion certificate, used the services of your own agent, or made other enquiries through your local authority Building Standards service. You may also have been an agent acting on behalf of an applicant.

The Scottish Government would like to obtain your views and feedback on the customer service you received. This will help identify which aspects are working well and any areas where improvements need to be made in the future.

We would be most grateful if you would spare 5 or 10 minutes to complete the online survey. This may take a little longer depending on how much feedback you wish to give.

### PLEASE CLICK HERE TO LAUNCH THE SURVEY

Your feedback is important to us, even if you are not able to answer all questions or have had limited contact with the local authority Building Standards service.

Further information, including our contact details, can be found via the survey link.

Many thanks for your time and contribution.

Kind regards,

Pye Tait Consulting (on behalf of the Scottish Government, Building Standards Division)
