

Community update – 26 June 2026

We understand that this continues to be a difficult and unsettling time for residents and families. We are continuing to work together with Clackmannanshire Council, Police Scotland, Scottish Fire and Rescue Service and other partners to keep people safe and provide updates as our investigations progress. We want to keep you informed about the work taking place and what it means for the community.

Community meeting

Thank you to residents, representatives from the local housing association, utility companies, local resilience partners and Clackmannanshire Council who attended the community meeting on 23 June. We appreciated the opportunity to share an update with you and to listen to your feedback and concerns.

A copy of the [presentation](#) that was shared at the meeting is available on Clackmannanshire Council's [MRA community updates](#) document page.

Resident access

This week, we have vacated the residential area to allow the wider-scale removals to take place safely. From Monday 29 June, we will start our next phase of drilling on Nechtan Drive, Dunmoss View and The Glen. This means pedestrian access will be permitted to the following timeslots on **Wednesday 1 July and Friday 3 July.**

- Langour: 12-1pm
- Dunmoss View: 1-2pm
- Nechtan Drive: 2-3pm
- Benbuck View: 3-4pm

Please contact the Council's dedicated helpline on 01259 452010 to arrange your booking. To help keep everyone safe, please do not come to site without a confirmed booking through the Council. Unfortunately, access cannot be provided without this confirmed booking.

Monitoring and investigations

This week we have continued with monitoring and investigation work across the site to help us better understand what is happening below the surface. This week, our investigations have moved to The Glen and the land adjacent to Park Street and Ochilview. We have also installed monitoring pins on some houses, to establish any movement affecting those properties.

Next week we will be drilling boreholes on Dunmoss View and Nechtan Drive and undertaking geophysical surveys on Benbuck View. Further drilling has also been scheduled on Langour for week commencing 6 July. We will provide a further update to this next week. We are also carrying out camera scans and geophysical surveys to help build a clearer picture of ground conditions. LiDAR surveys are continuing every week to compare movement over time and create heat maps that help us track any changes across the site. In response to community feedback, we have set up a webpage where you can view mining data for the area, results from our monitoring and copies of the heat maps on available on our [website](#).

Community Liaison Officer

Our Community Liaison Officer, Sarah McDaid, is available on 07392 318280 or sarah.mcdaid@miningremediation.gov.uk to raise any questions or concerns. Alternatively you can contact our customer service team on 01623 637000. (Monday to Friday, 8.45am to 5pm) or customerservice@miningremediation.gov.uk.

To report a coal mine hazard at any time, please call 0800 288 4242, available 24 hours a day, 7 days a week.

We recognise how difficult and disruptive this situation is, and we want to thank residents for their continued patience and cooperation. We will continue to share updates as more information becomes available.
