THIS PAPER RELATES TO ITEM 6 ON THE AGENDA

CLACKMANNANSHIRE COUNCIL

Report to Clackmannanshire Council

Date of Meeting: 5th October 2023

Subject: Corporate Risk Management Strategy

Report by: Strategic Director – Partnership & Performance

1.0 Purpose

1.1. This report presents the Council's Corporate Risk Management Strategy 2023.

2.0 Recommendations

It is recommended that Council:

- 2.1. **Notes, challenges and comments on** the contents of the Corporate Risk Management Strategy 2023; and
- 2.2. having done so, **Approves** the Corporate Risk Management Strategy 2023.

3.0 Considerations

3.1. Background

- 3.1.1. Though they may not always be explicitly aware of it, the Council and individual officers manage a wide range of differing risks on a daily basis. Risk-taking is an essential component of innovation and progress, and it could be argued that the primary reason for Councils' existence is to manage risks to the communities we support and protect. There are many inherent challenges in the delivery of operational functions and transformation activities, and the focus must always be on how services mitigate wider risks, realise community benefits and support the achievement of positive outcomes for the people and area of Clackmannanshire.
- 3.1.2. There are extensive complexities and inter-dependencies in the strategic planning landscape, legislative frameworks and the standards, requirements and good practice in each service area. As has been seen clearly in recent years, issues internal to the Council, and the local authority area, can also be significantly influenced by wider events across Scotland, the United Kingdom, Europe and the global community. In order to deliver on the statutory duty to demonstrate Continuous Improvement and Best Value in our operations, the Council must be acutely aware of the potential impact of its decisions in relation to a range of governance considerations and macro-environmental factors.
- 3.1.3. The role of many corporate functions includes self-assessing, advising, challenging and holding services to account regarding how they are managing a range of cross-cutting themes, such as equalities and sustainability. While efficiency and the removal of

bureaucracy and 'failure demand' is a central focus, the overriding principles of transparency and accountability do require that core documentation and assurances be provided in order for Elected Members, Chief Officers and audit bodies to satisfy themselves as to the effectiveness of strategic oversight and scrutiny. The volume of requirements placed on managers and officers can, at times, seem daunting and some elements may appear contradictory, requiring prioritisation or guidance on how they should be managed in tandem to achieve multiple goals.

3.1.4. It is vital to have a clear understanding, at the highest level, of how our respective risk controls form a single, cohesive, comprehensive and integrated mechanism for driving activities and providing a high level of governance assurance. This strategy, therefore, aims to clarify these controls and explain the overall mechanism, providing support and guidance to staff in the application of principles. While risk management is often seen as a negative, a key purpose of the strategy is to reframe the focus away from the challenges we face and firmly onto how the collective resource and expertise of officers and partners can be exploited in order to overcome barriers, release potential and make meaningful improvements to the lives of Clackmannanshire's people and communities.

3.2. Corporate Risk Management Strategy 2023

- 3.2.1. While guidance and advice has been provided to staff for many years, the strategy formalises the purpose of risk management, linking to higher-level plans and strategies and documenting the relationships between various corporate approaches. Key elements of the Local Code of Governance and Performance Management Framework are referenced and the owner of the Corporate Risk Management approach is outlined as the Strategic Director of Partnership & Performance. Available good practice has been incorporated, as detailed in the Policy Statement in relation to the UK Government's Orange Book: Management of Risk Principles and Concepts. The strategy has also been benchmarked with those of other organisations, including our key partners in delivering Health & Social Care Services.
- 3.2.2. The Policy Statement outlines the Council's vision for Risk Management:

"To promote a culture where awareness of potential threats is embedded in decision-making at all levels, ensuring appropriate ownership and transparent management of risk to support service delivery and continuous improvement."

3.2.3. The Council's key aims in relation to Risk Management are to be:

Aware of potential risks in the internal and external business environment; **Transparent** in our use of reliable information to manage risks and make decisions;

Consistent in our application of risk management principles;

Collaborative in identifying risks, and developing and sharing innovative solutions;

Clear on the type of risks we can and cannot tolerate;

Proportionate in balancing risks and benefits, and not 'over-controlling'; and

Objective in assessing risks and using evidence and management information.

3.2.4. The strategy then outlines the aims and benefits of risk management, as well as key processes and considerations, and the support available to officers and managers. Definitions are provided, for risk itself, as well as various related terms, as are roles, responsibilities and governance requirements. Maturity levels are then discussed alongside assurance frameworks, best practice and recommendations regarding areas for improvement. The final section of the main strategy provides a high-level self-assessment of the Council's key controls in relation to risk management, demonstrating links to maturity model themes and the local aims detailed above.

Risk Strategy Appendices and Future Revisions

- 3.2.5. For the first time, Appendix A outlines a Risk Appetite Statement for the Council. This aims to solidify many of the high-level concepts and principles stated in the strategy and provide a grounded summary of how these apply in relation to specific risk categories. While relevant areas could be grouped in many different ways, and there is substantial overlap, categories have purposefully been made as broad as possible, to ensure they encapsulate any work that may be undertaken, or issues that may arise in the future.
- 3.2.6. The initial categories agreed are below (see definitions in Appendix B):

Assets	Cultural	Governance	Security
Community	Environmental	Information	Strategic
Continuity	Financial	Reputational	Wellbeing

- 3.2.7. The Risk Appetite Statement fulfils three key goals, with the first being to state our key priorities in relation to each category. As well as the behaviours and values we wish to see exemplified, the statement also details key undesirable factors and issues, in order to outline our core tolerance levels, below which risks will not be taken. Using the appetite levels listed, the extent to which risk-taking is acceptable in each area has been agreed with Chief Officer and category leads.
- 3.2.8. The list was then re-ordered based on the agreed appetite levels, showing the area with the least tolerance of uncertainty at the top, and the greatest appetite for innovation at the bottom. This fulfils the third aim of the statement, which is to support the prioritisation of risk controls for staff and managers. While we would always aim to address as many risks as possible and achieve multiple benefits with any piece of work, there are occasions when not all objectives can be reached simultaneously and difficult decisions must be made regarding which goals should supersede. The statement, therefore, aims to assist staff and managers in prioritisation, with the key top-level fundamental of adhering to the law at all times. Safeguarding Wellbeing and reducing risks of physical or psychological harm is shown as the next priority, down to the Strategic category, where we are the most keen to be innovative, aspirational and ambitious, providing this does not have a detrimental impact on any other category.
- 3.2.9. Appendix B shows the revised risk guidance, again focussed on how the high-level principles should be applied in an operational context. Previous versions of this guidance have been circulated and used in risk assessments for many years, and the main changes are included in section 4, risk evaluation. The scoring definitions for risk 'likelihood' have been expanded to also summarise risk 'proximity', i.e. how soon the risk is likely to occur, in order to better understand the urgency of addressing the relevant issue. Guidance for scoring risk 'impact' has also been expanded from the previous five categories (continuity, finance, legal, reputation and health & safety) into the newly developed list of twelve to provide a better-rounded assessment of many of the 'softer' issues that were not well-represented in the more clinical previous categories.
- 3.2.10. A key addition to Appendix B is section 8, the Governance Checklist. The motivation for including this was in response to many of the issues noted in section 3.1.3 above. It is hoped that having a single document listing core tangibles and requirements will clarify the governance expectations for staff and managers, support compliance and consultation with subject-specific experts, and ultimately provide robust assurance.
- 3.2.11. Appendix C provides a Delivery Plan for raising organisational maturity levels in relation to risk management and improving integration with other corporate approaches. This includes performance indicators for monitoring the success of the strategy, as well as detailing plans for introducing category indicators (to enable horizon-scanning by the Corporate Risk & Integrity Forum). Indicators relating to specific corporate risks are also

discussed, with the aim of enhancing evidence-based risk assessments, using performance indicators to inform likelihood/proximity and impact scores. A risk assessment is then presented, linking to both the list of performance indicators, and the subsequent action plan.

3.2.12. For information, Appendices D and E then provide the Corporate Risk & Integrity Forum Terms of Reference and the Association of Local Authority Risk Managers Maturity Model, respectively. While it is hoped that the overall principles and strategy are broad enough for a five-year life-cycle to be appropriate, Appendices A, B and C will be revised on an annual basis to ensure they have a current focus and are cognisant of emerging issues in the operating environment.

4.0 Sustainability Implications

4.1. There are no direct sustainability implications arising from this report.

5.0 Resource Implications

- 5.1. Financial Details There are no direct financial implications arising from this report.
- 5.2. The full financial implications of the recommendations are set out in the report. This includes a reference to full life cycle costs where appropriate. Yes ✓
- 5.3. Finance have been consulted and agreed the financial implications as set out. Yes ✓
- 5.4. Staffing There are no direct staffing implications arising from this report.

6.0 Exempt Reports

6.1. Is this report exempt? Yes (please detail the reasons for exemption below) No 🗹

7.0 Declarations

The recommendations contained within this report support or implement our Corporate Priorities and Council Policies.

(1) **Our Priorities** (Please double click on the check box ☑)

Clackmannanshire will be attractive to businesses & people and ensure fair opportunities for all

Our families; children and young people will have the best possible start in life

Women and girls will be confident and aspirational, and achieve their full potential

Our communities will be resilient and empowered so that they can thrive and flourish

(2) **Council Policies** (Please detail)

8.0 Equalities Impact

8.1 Have you undertaken the required equalities impact assessment to ensure that no groups are adversely affected by the recommendations? Yes No ✓

There are no direct equalities implications arising from this report (having screened at first stage, impacts on protected characteristics have been assessed as neutral).

9.0 Legality

9.1 It has been confirmed that in adopting the recommendations contained in this report, the Council is acting within its legal powers.

10.0 Appendices

10.1 Please list any appendices attached. If there are no appendices, please state "none".

Appendix 1 – Corporate Risk Management Strategy 2023

Appendix A - Risk Appetite Statement

Appendix B – Corporate Risk Guidance & Governance Checklist

Appendix C – Corporate Risk Management Strategy Delivery Plan

Appendix D - Corporate Risk & Integrity Forum Terms of Reference

Appendix E - ALARM Risk Management Maturity Model

11.0 Background Papers

11.1 Have you used other documents to compile your report? (All documents must be kept available by the author for public inspection for four years from the date of meeting at which the report is considered)

Yes (please list the documents below) No

HM Treasury Orange Book: Management of Risk – Principles & Concepts

HM Treasury Orange Book: Risk Appetite Guidance Note

2. Foreword & Purpose of Risk Management Strategy

Clackmannanshire Council remains committed, despite increasing demands and financial constraints, to broad and ambitious strategic objectives. These aim to facilitate the physical, social and economic regeneration of Clackmannanshire, and reduce inequalities in the area. In addition to locally-defined objectives at a corporate and service level, the Council must also fulfil or adhere to a range of statutory duties and national recommendations.

The Council sets out its key objectives, and how these will be delivered in:

- the Clackmannanshire Alliance's Local Outcomes Improvement Plan;
- the Council's Corporate Plan: Be the Future (including the transformation programme and statement of corporate priorities); and
- a wide range of Business Plans and thematic strategies.

Guiding principles are defined in the Local Code of Governance, and the Performance Management Framework, which aims "to make best use of all available resources and achieve continuous improvement and progress towards desired outcomes". While plans and priorities are revised on a cyclical basis, in response to changing community needs, our enduring focus is on the Best Value principles of:

- Balancing the quality of services with cost;
- Ensuring services are sustainable;
- Promoting equality and diversity;
- Being accountable and transparent; and
- Engaging with local communities.

Risk management is a key component of governance and performance, assisting the Council to deliver on these objectives by examining the potential barriers or challenges. This critical tool supports an organisation in planning more realistically, taking into account problems that might occur, preventing them (where appropriate and possible) and reacting more effectively if they do occur. This strategy describes the Council's core Risk Management principles, processes and responsibilities, outlining current arrangements and development plans.

The Council provides a diverse range of services and, while the nature of risks may vary substantially, this strategy and supporting guidance aim to be applicable at multiple operational and strategic levels. All staff members have a responsibility for managing some form of risk, and the strategy also contextualises how the principles apply in some specific risk-related areas. Risk management should not be viewed as an isolated process, but should be used in conjunction with all other work. While it is essential to consider potential negatives, the aim is to enable the positives, supporting us to:

Be the CUSTOMER	Listen to our customers, communicate honestly and with respect and integrity
Be the TEAM	Respect each other and work collectively for the common good
Be the LEADER	Make things happen, focusing always on our vision and outcomes, and deliver high standards of people leadership and corporate governance
Be the COLLABORATOR	Work collaboratively with our partners and communities to deliver our vision and outcomes
Be the INNOVATOR	Look outwardly, be proactive about improvement and strive always for innovation and inclusive growth
Be the FUTURE	Work always towards ensuring that we deliver our vision and live our values, so that we become a valued, responsive Council with a reputation for innovation and creativity

3. Risk Management Policy Statement

Clackmannanshire Council embraces its duty to manage risks, in recognition of the benefits this brings to planning, governance and assurance.

The Council subscribes to the principles in the UK Government's Orange Book (Management of Risk – Principles & Concepts), that Risk Management will:

- be an essential and fundamental part of **governance and leadership** at all levels;
- be an integral part of all organisational activities to support decision-making in achieving objectives;
- be collaborative and informed by the best available information and expertise;
- have processes that are structured to include:
 - o identification, assessment and prioritisation,
 - selection of treatment/management options,
 - o insightful monitoring, and
 - timely, accurate and informative reporting of risks to enhance decision-making, management and oversight; and
- be continually improved through learning and experience.

The Council's vision for Risk Management is:

"To promote a culture where awareness of potential threats is embedded in decision-making at all levels, ensuring appropriate ownership and transparent management of risk to support service delivery and continuous improvement."

The Council's key aims in relation to Risk Management are to be:

Aware of potential risks that exist in the internal and external business environment;
 Transparent in our use of reliable information to manage risks and make decisions;

• **Consistent** in our application of risk management principles;

• Collaborative in identifying risks, and developing and sharing innovative solutions;

Clear on the type of risks we can and cannot tolerate;

• Proportionate in balancing risks and benefits, and not 'over-controlling'; and

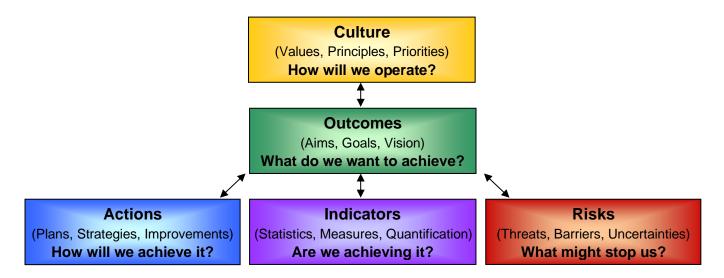

Objective in assessing risks and using evidence and management information.

This policy is intended to guide risk management in relation to all Council activities, including external and partnership work. Where separate risk management arrangements are agreed, they must meet the basic standards and governance requirements set out here. This does not supersede, but should complement, regulatory or best practice guidance in relation to specific areas of service delivery. The Council will empower and support staff to manage risk, and this strategy provides a structured framework for raising and escalating concerns, to ensure they are fully considered and, where appropriate, incorporated into registers and activities.

A risk appetite statement assists organisations in more effectively allocating resources, prioritising risks and mitigations, and demonstrating consistent and robust decision-making. The Council has, therefore, defined the initial levels of risk appetite shown in Appendix A, which will be revised on an annual basis. The statement details the levels of appetite (see Definitions), and refers to the risk categories defined in the Guidance (Appendix B). The Guidance & Governance Checklist will also be revised annually, as will the Delivery Plan (Appendix C). The strategy includes, for information, the Terms of Reference for the Corporate Risk & Integrity Forum (Appendix D), and the Association of Local Authority Risk Managers (ALARM) National Performance Model for Risk Management in the Public Sector (Appendix E).

4. Aims & Benefits of Risk Management

Risk Management is not an isolated area of work, but should be embedded in all processes to make planning, governance and response more effective. It is not just listing negative things that might happen, but considering what we want to achieve and what the uncertainties are, so that we can take them into account when planning. They may be risks or issues (see Definitions), operational or strategic, service-specific or corporate, and many must be managed consistently across the organisation.

Performance Management can become complicated and unfocused if actions, indicators and risks are not clearly linked to the outcomes we aim to achieve. It is also not enough to passively monitor and report on performance – it must be managed. With risk, this means assessing how desired outcomes could be compromised, analysing the effectiveness of any existing controls in preventing or reducing the impact, deciding whether further mitigation is required, and ensuring appropriate action is taken.

There are many issues outwith the Council's control and, even with unlimited resources, not all risks could be mitigated. Change, innovation and creativity always involve risk but there are also risks in not making changes and taking opportunities. Therefore, in addition to whether we **can** mitigate a risk, we must also assess whether it **should** be mitigated, and to what extent, with all decisions guided by our culture, organisational priorities and risk appetite statement.

While it can be useful to categorise risks (see Guidance), in order to inform and clarify assessments, this is rarely as simplistic as it seems. Sometimes the cause of a risk may be in one category, but the consequences in another, or multiple categories. Therefore, judgement may be required in assigning a category and applying the risk appetite statement. This aims to support decisions around ownership and treatment options, where consideration should be given to whether the 'leading' category (related to cause/likelihood) or 'lagging' category (related to impact) is relevant.

The **benefits** of risk management include:

- Setting the desired risk culture;
- Enabling risk-taking in chosen areas;
- Improved operational efficiency;
- Better mitigation & maximised opportunities;
- Increased ability to secure funding;
- Enhanced political and community support;
- Reduced losses from incidents & illnesses;
- Demonstration of good governance;
- Protection from unexpected financial losses;
- Increased effectiveness of change initiatives;
- Protection of assets and reputation; and
- Achievement of organisation's objectives.

However, a successful framework requires:

- Leadership;
- A supportive organisation;
- A simple, understood process;
- Integration with other management tools;
- Focus on facts and evidence;
- The mandate to challenge constructively;
- Methods, tools and techniques;
- Stakeholder buy-in;
- · Committed and competent people;
- Both strategic and operational applicability;
- · Visibility of risk professionals; and
- Assurance from a senior approach owner.

5. Processes, Considerations & Support

Appendix B shows the risk assessment process and further guidance on each stage. Risk management should focus on **key** objectives and risks, as it should add value and be proportionate, but not resource-intensive. At any stage, the decision may be made to exclude a risk from the register (or log/profile) if it is found to be less significant/likely than first believed (though the rationale should be recorded/reported).

Staff may be familiar with risk assessment within the categories listed, but a holistic approach must encompass all of these, and apply equally to front-line services and internal processes. The Council must prioritise and target resources: difficult decisions must be made, for example, on whether the benefit of improving effectiveness outweighs the cost, or whether short-term efficiency outweighs long-term investment. A comprehensive approach assists in understanding and balancing dependencies, priorities and appetite to ensure that informed decisions are made and can be justified.

If risks are underdeveloped and not considered in sufficient detail, it is unlikely that they will be managed effectively. Risk identification is often the most difficult step as there can be no set process for this, and it is much easier to review existing risks, than to consider what is missing. While it can be useful to refer to other risk logs, these will not always identify newly emerging risks, nor those specific to our local area, organisation or goals, so additional identification techniques are required.

'Risks' found in the Identification stage will often actually be causes so analysis is key to clarifying implications and any potential control requirements. Though the process inevitably involves projection and speculation, looking very far into the future can sometimes introduce too many uncertainties and be detrimental. Scoring should take into account as much data and information as possible and is a high-level summary of severity. As there is a subjective element to scoring, these should be rationalised and compared with each other to ensure they reflect the relative severity of different risks.

Perceptions can vary widely so risk reviews should include as many different people as possible so extreme views are 'averaged out' and the risk assessment becomes more stabilised and objective. However, as it would be unmanageable for all staff to assess risks collectively, a hierarchy of risk logs should be used. Risks should be escalated and demoted, based on severity, the service areas affected, and whether the owner has the resources and authority to manage the risk.

The risk reporting process is also included in Appendix B, as are key details that should be recorded on the Pentana Risk system. Risk logs at each level should be reviewed frequently and updated cyclically, as well as when the nature (or our understanding) of the risk changes and/or mitigations take effect.

Facilitation and advice with the risk assessment process is available from central support in the Partnership & Performance directorate on request. This can save time and effort by incorporating good practice and challenge at the point of defining or fundamentally reviewing a risk log. Regular contact will be maintained with directorate management teams to ensure there is clarity on corporate requirements, status and progress in developing, recording and reporting risk logs, and any issues or exceptions.

Support is also available from other sources, such as:

- Internal and external audit and inspection bodies, and other national groups and fora;
- Other local authorities and public services (either risk management or service specialists);
- The Council's insurance claims handlers (claims analysis, training & strategy/policy review); and
- The Association of Local Authority Risk Managers (ALARM).

6. Definitions

"Risk is the effect of uncertainty on objectives."

International Standards Organisation (ISO)

Planning can only be realistic if we also consider factors that might stop us achieving our goals. We all manage risk on a daily basis – watching the weather forecast and taking an umbrella, or checking for vehicles before crossing a road. Though we may not realise it, we assess risks and benefits in most decisions we make. Organisationally, risk management is the process of systematically identifying and analysing potential threats, and making decisions on how to act based on balancing priorities and needs.

Appetite	The level of risk the Council is willing to accept. The focus moves from removal of risks (Averse) to balancing control with realising high-value benefits (Cautious) to placing greater priority on creativity, even if activities carry a high residual risk (Eager):
	Averse Avoidance of uncertainty and prevention of exposure is the key objective; Resistant Preference for safe options with low inherent risk; Cautious Preference for safe options with low residual risk, focus on balance; Willing to consider options with acceptable benefits; Eager Keen to be innovative and focus on maximising opportunities and benefits.
Assurance	Assessing design and effectiveness of controls by applying scrutiny processes, either in relation to a specific risk, or the Enterprise Risk Management Framework as a whole.
Enterprise	The organisation across which risk management principles and practices should be consistently applied to ensure appropriate response and governance.
Framework	The policies, methodology, procedures, guidance, systems, governance arrangements, training and communication that comprise the Council's risk management toolkit.
Horizon Scan	The process of monitoring the internal and external operating environment for newly emerging concepts, factors and events that may present opportunities or threats, may influence risks already identified, and/or may result in the identification of new risks.
Issue	While some differentiate between potential risks and issues that are already occurring, it is rare, particularly at a strategic level, for risks to materialise overnight. It is more often an analogue scale, emerging to a certain degree and changing over time. Thus, this policy does not distinguish, with the extent of occurrence reflected in likelihood scores.
Mitigation	The process of reducing a risk through the application of actions and controls, either focussed on the cause of a risk or the potential consequences:
	Actions Future activity to mitigate risks which, once implemented, become controls; Controls Mechanisms already in place to mitigate risks, such as existing policies, procedures or governance protocols (though these remain under review).
Opportunity	While risks focus on unfavourable events and impacts, opportunities focus on the potentially positive or beneficial results of uncertainty.
Owner	The person responsible for managing and reviewing an item – note that the risk owner may be a different person than the associated action or control owners.
Scoring	Grading/rating the assessment of the risk's severity, taking into account different factors:
	Inherent Residual Target Gross or original risk, summarising severity before mitigations are applied; Current or present risk, incorporating the influence of existing controls; The level to which a risk must reduce before it will be tolerated, reflecting both how controls are reducing it, and how actions will reduce it further.

See Corporate Risk Management Guidance (Appendix B) for additional definitions, including categories.

and central support, and checked by the third line of internal & external audit.

A robust model of assurance whereby the services managing risks and implementing actions and controls are the first line, supported by the second line of corporate advisers

Three Lines

7. Roles, Responsibilities & Governance

"It is the duty of a local authority to make arrangements which secure best value ... Best value is continuous improvement in the performance of the authority's functions."

Local Government in Scotland Act, 2003

All Employees

Responsibility for raising potential risks and mitigations through 121s, the Performance Review and Development (PRD) process, team meetings and other formal and informal channels, including via central support colleagues. All staff should contribute to risk log development, complete inductions and annual mandatory training, and ensure they adhere to risk management, and other corporate policies and procedures, at all times.

Team Leaders and Project, Programme & Senior Managers

Manage service area risk log development and encourage engagement in risk identification and assessment. Escalate, demote or close risks, ensuring systematic updates are provided. Manage risks, or delegate to appropriate owners, review controls within their remit, and complete required actions. Support decisions around suitable approaches and treatment options, informed by good practice and recommendations from audit and inspection bodies.

Risk, Action, Control & Approach Owners

Ensure the efficient and effective management of risks in accordance with guidance. Complete, or ensure completion of, required actions within agreed time and resource constraints. Review controls, strategies and associated procedures and guidance within cycles defined in Business Plans, and ensure adherence to and integration with risk management and other corporate strategies. The Strategic Director, Partnership & Performance has overall responsibility for defining, deploying, and ongoing review and improvement of the risk management approach.

Corporate Risk & Integrity Forum (see also Appendix C)

Central support and other thematic corporate/service leads review risk arrangements and their application, sharing information on management and mitigation. Provide training, advice and support, ensuring the Council fulfils statutory duties and follows good practice in their areas of specialism. Detailed responsibilities are shown in the Terms of Reference, including supporting deployment of risk processes, and providing regular progress reports to ESLG.

Internal & External Audit & Inspection Bodies

Provide independent challenge and objective evaluation of the adequacy and effectiveness of the framework of governance, risk management and control. Proactive evaluation of controls and proposals, and advice on design of potential control strategies. Internal Audit are also part of the Corporate Risk & Integrity Forum to ensure assessments are fully informed and that transparent lines of communication are held to ensure advice and expertise are fully exploited.

Extended Strategic Leadership Group (ESLG)

Ensure all employees understand their responsibilities and adhere to principles and processes. Ensure risks are documented, owned, analysed, managed and escalated using appropriate tools and mechanisms (including the Pentana Risk system). Provide direction and steer for development of risk (and other) strategies, actions and controls, ensuring alignment with corporate priorities. Apply the Risk Appetite Statement, balancing and prioritising risks and benefits, and drive risk culture and maturity, ensuring it is embedded to support Best Value and continuous improvement.

Audit & Scrutiny Committee (and Council/Other Committees/Boards)

A&S challenges risk arrangements, scrutinising risk reports and other governance and audit outputs and recommendations. All Council and Committee reports should include analysis of related risks, therefore, all Elected Members have responsibility for challenging whether risks are summarised, evaluated and managed appropriately. Members oversee progress on implementing actions and reviewing controls, ensuring decision-making, planning and governance mechanisms are informed by risk analysis.

8. Maturity Levels, Best Practice & Recommendations

In order to develop arrangements, we must first establish where we are with regard to best practice and organisational maturity, what we would like to achieve by the end of this strategy's life-cycle, and how we will achieve this. Appendix E provides an extract from the National Performance Model for Risk Management in the Public Services, developed by the Association of Local Authority Risk Managers.

This contains similar themes and complementary principles to the frameworks used by:

- our internal Annual Governance Statement self-assessment (based on European Foundation for Quality Management/Public Service Improvement Framework (EFQM/PSIF));
- the Accounts Commission Publication of Information (Standards of Performance) Direction:
- the Institute of Internal Auditors (IIA);
- the Chartered Institute of Public Finance & Accountancy (CIPFA);
- the HM Government Orange Book: Management of Risk Principles & Concepts; and
- the International Organisation for Standardisation (ISO 31000 Risk Management).

Appendix E presents a detailed risk management maturity model, while the Institute of Internal Auditors summarises the levels and characteristics as follows:

Risk Maturity	Key Characteristics
 Risk Naïve 	No formal approach developed for risk management
Risk Aware	Scattered silo based approach to risk management
Risk Defined	Strategy and policies in place and communicated. Risk appetite defined
Risk Managed	Enterprise wide approach to risk management developed and communicated
Risk Enabled	Risk management and internal control fully embedded into the operations,
	including management assurance

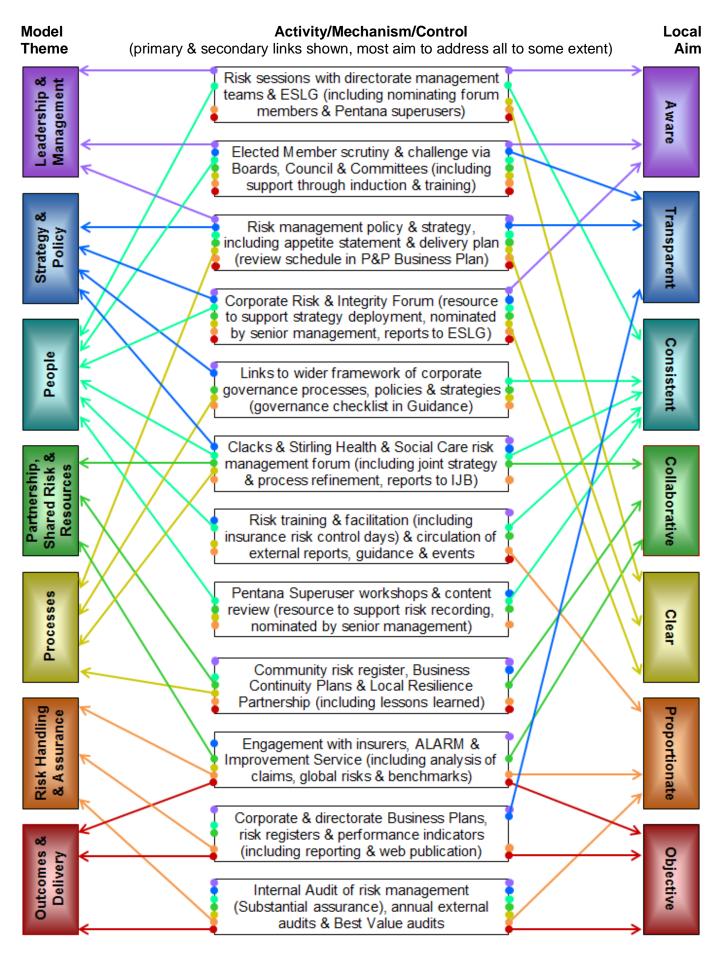

As demonstrated on the following page, it has been assessed that, with the approval and deployment of this strategy, Clackmannanshire Council will be fulfilling most level 2 requirements shown in Appendix E, and some of the level 3 and 4 activities. It is the aim of this strategy to ensure the organisation fully meets all requirements of level 4 maturity within the next 5 financial years. It is felt that this is ambitious enough to improve the support and assurance that risk management can provide to other organisational processes but not so ambitious as to be unrealistic in the current environment.

Appendix C details proposed actions to achieve this level of improvement, structured around the key model themes. Though the effectiveness of risk management arrangements can be difficult to quantify, a list of proposed performance indicators has also been included. By definition, however, these will only ever give an indication of performance levels and none can individually provide assurance without a range of complementary qualitative information. Risks related to the strategy's implementation are also included.

Given the strategy's 5 year life-cycle, and with experience in recent years having clearly demonstrated that flexibility is essential, the delivery plan will not be viewed as a static list. It initially contains the most urgent and important steps to be taken, and items will be added and removed based on the success of initial actions, and relevance to organisational, technological and environmental developments. Therefore, the plan will be reviewed on an annual basis, alongside Appendices A and B, with review, approval and progress updates via the quarterly Corporate Risk & Integrity Forum and, as appropriate, reported to Audit & Scrutiny Committee.

The table on the following page summarises current risk management activities and mechanisms, mapped to the local risk management aims and the ALARM maturity model (shown in the Policy Statement and Appendix E, respectively). Areas for improvement are also highlighted, and links to the strategy Delivery Plan (Appendix D) are also stated. Where director/directorate is stated, this currently refers to the four areas of People, Place, Partnership & Performance, and Health & Social Care (to be re-assessed if significant future restructuring occurs).

9. Key Mechanisms & High-level Self-assessment

See also Appendices C & E for the development & improvement delivery plan, and full maturity model.

Appendix A – Risk Appetite Statement

Risk appetite is the level of risk the Council is willing to accept in relation to particular areas of operation. A risk appetite statement assists organisations in more effectively allocating resources, prioritising risks and mitigations, and demonstrating consistent and robust decision-making. The risk categories shown below are defined in the Corporate Risk Management Guidance.

The focus moves from removal of risks (Averse) to balancing control with realising high-value benefits (Cautious) to placing greater priority on creativity, even if activities carry a high residual risk (Eager):

Averse Avoidance of uncertainty and prevention of exposure is the key objective;

Resistant Preference for safe options with low inherent risk;

Cautious Preference for safe options with low residual risk, focus on balance;

Open Willing to consider options with acceptable benefits;

Eager Keen to be innovative and focus on maximising opportunities and benefits.

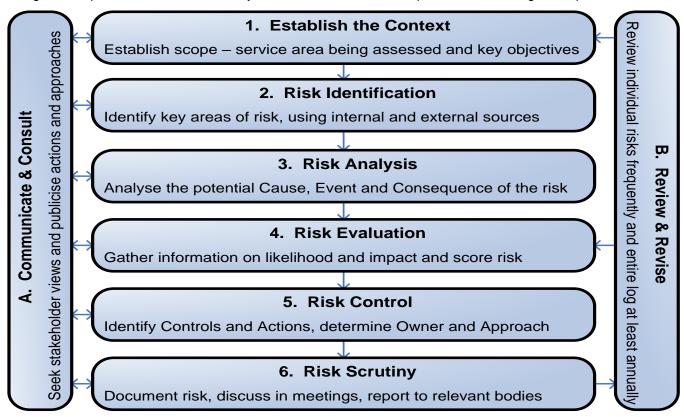

The Council has agreed the following levels of initial appetite (to be revised annually). The list has been prioritised to show the areas where we have the least tolerance of uncertainty at the top, and the greatest appetite for innovation at the bottom.

Governance	Averse to options that do not comply with approved Council governance or statutory or regulatory requirements.
Wellbeing	Open to adopting new options that improve the wellbeing of our communities and staff but Averse to approaches or practices that expose individuals to risk of physical or emotional harm, with particular supports for children, older people and other vulnerable groups.
Continuity	Open to new options that improve preparedness, resilience and cost impacts but Resistant to untested or untried options that carry anything but low inherent risk.
Security	Open to new options that improve safety and efficiency (subject to Governance requirements) but Resistant to untested or untried options that carry anything but low inherent risk.
Community	Open to adopt or pilot novel or innovative approaches that have the potential to deliver our LOIP objectives and improve the life chances of our most disadvantaged people and communities but Cautious to ensure equality and sustainability sit at the heart of everything we do.
Environmental	Eager to adopt strategies and options that will enable our transition to Net Zero and Community Wealth Building objectives but Resistant to options that may not be sustainable or damage the quality of life of our wider communities now or in the future.
Financial	Eager to drive innovation in the use of funding to deliver Net Zero, maximise benefits for citizens and staff and make significant and sustainable cost reductions but Resistant to ensure Best Value and low risk impacts on service delivery and statutory duties.
Cultural	Eager to create a positive and inclusive organisational culture underpinned by a sustainable and resilient workforce but Cautious to ensure we have the right people, with the right skills doing the right work so as to ensure improved organisational outcomes.
Assets	Eager to drive innovation in the use of assets to deliver Net Zero, maximise benefits for citizens and staff and make significant sustainable cost reductions but Cautious to ensure we meet and deliver our statutory and regulatory obligations.
Reputational	Eager to drive innovation and options that improve engagement and services to citizens but Cautious to ensure we always uphold Council and public service values and maintain the trust of our communities and stakeholders.
Information	Eager to be well-informed and share performance, process and good practice information in the interests of accountability, transparency and collaborative improvement, but Cautious around use of robust sources and ensuring handling is efficient, secure and appropriate at all times.
Strategic	Eager to identify and apply innovative practice in our ambitions to achieve transformational change, yet Cautious that these opportunities have identified tolerances in line with the objectives of the opportunity and that there is a sound evidence base with reasoned arguments on how to target emerging or existing risks.

Appendix B – Corporate Risk Management Guidance & Governance Checklist

This guidance provides information on key considerations for each step in the Risk Management process:

A. Communicate & Consult

Two-way communication is important to every step in the risk management process to ensure the right information is gathered and people are aware of action to be taken, and why. Staff members (at all levels), other teams/services/ organisations, members of the public/community groups, elected/board members, senior management and central support teams can all contribute and/or benefit from others' knowledge. Different groups will have different perspectives and experience of practical, operational and strategic issues.

Different stakeholders can improve efficiency and effectiveness by **providing data**, **information and knowledge** to clarify areas of uncertainty. Others can provide insight into issues they've **identified** or **dealt with** or **solutions** they've found, and resource requirements can be minimised by **sharing information**, **experiences and controls**. If procedures are put in place to control risks, it's also highly important to communicate **what they are**, the **reasons** for them being put in place and, therefore, why it's important that they're **adhered to**.

B. Review & Revise

Risk management shouldn't be seen as a one-off, or even an annual task. The nature of risks, progress and the effectiveness of controls can change in a short period of time. It's therefore recommended that **key risks are discussed on a frequent basis** (ideally monthly), with developments recorded, and the relevant people informed. If risks are reviewed **proactively**, more frequently than they're reported, updates are available when required, rather than being rushed as part of the reporting process. As well as focussing on the risks already identified, it's also important to review the entire log, at least annually, and **re-assess whether these are still the key risks**.

1. Establish the Context

There can be a temptation to just list everything that could go wrong, but this can be unproductive. The vital first step is to **clarify the scope** of the exercise - always **focus on objectives**. An organisational model can be a useful tool (templates available from Partnership & Performance). Having a **concise summary** of the team/service will focus discussions and, as no completely systematic process can be used, should ensure all relevant aspects are considered. Risk management can only ever be a **'point in time' assessment** and, though it must involve projection, looking very far into the future can introduce too many uncertainties and be detrimental. It should be kept as **simple as possible** by looking solely at **goals within a set time period** (such as a single year).

2. Risk Identification

Steps 2-4 form the risk assessment, with identification often the most difficult step, partly as there can be **no set process** for this. Often registers (profiles) are developed purely from previous logs – this can be informative, but is unlikely to identify **newly emerging risks**. Logs from other **internal & external sources** can also be useful stimuli but a risk should only be identified as relevant if likely to have a specific impact on local goals.

Many different **methodical** or **ad hoc** processes can be used, e.g. **horizon scanning**, **brainstorming**, **facilitation**, or **self-assessment**. A **PESTELO** analysis assesses Political, Economic, Social, Technological, Environmental, Legal and Organisational implications of an objective. External sources such as other **Councils**, **partners** and **audit bodies** can also assist in risk identification, or the **categories** (see next page) can be used as prompts.

3. Risk Analysis

Risks are often **underdeveloped** – documented without **details and dependencies** being considered fully. Many 'risks' found in the Identification stage will actually be causes, such as 'demographic changes' or 'lack of resource' but we must focus on how this affect us achieving goals. The key areas to be developed at this stage are:

Cause The source or trigger. Risks generally originate from wider issues in the internal or external

environment, often outwith our control. Examples are: climate change, aging population, or legislative or organisational changes. Note that the cause is **not the key focus of the risk**.

Event How the cause specifically affects us. It may be a single point in time, such as staff not

delivering services (cause: industrial action), or it may develop more gradually, such as inability to meet increasing demands (cause: reduced budgets). Several events may arise from the same cause (e.g. withdrawal from European Union causing supply chain and recruitment difficulties).

Consequence The result of the event occurring. This should be more specific than 'inability to deliver on objectives' – it needs to consider which objectives – will they not be delivered at all, or less

effectively, etc.? As much detail as possible should be given on the stakeholders and services that could be affected, and the potential extent of implications relating to the different categories.

It can be useful to **categorise** risks (next page) to inform and clarify assessments, and support **ownership** and **treatment** decisions. Sometimes the cause may be in one category, but consequences in another, or multiple. Judgement/support may be required in categorising and applying the risk appetite statement, and should consider whether the 'leading' category (linked to cause/likelihood) or 'lagging' category (linked to impact) is most relevant.

4. Risk Evaluation

As many elements as possible should be **clarified** and **quantified** to better understand the **nature** and **extent** of the risk. While, again, there are no entirely scientific methods for evaluation and scoring, it should be **evidence-based**, and take into account as much management, organisational and environmental information as possible.

Evaluation should include consideration of:

The past Has it happened before? Was it managed effectively? What lessons were learnt?

The present Are similar circumstances developing? How are others managing it?

The future Do forecasts suggest it will occur/re-occur in the near future?

Organisational factors Will changes to leadership, policies, resources or other current projects affect the risk?

External changes Are there national initiatives/targets/aims? Are there legal factors to consider? **Performance indicators** Is the risk occurring? Are we managing it effectively? What are the projections?

Scoring (rating) quantifies the **likelihood** & **impact** of a risk occurring, summarising overall **severity**. Likelihood incorporates **proximity** (how soon it may occur) – consider which factor is more significant when scoring. There is a degree of subjectivity so relative scores should be **compared** and **rationalised** to ensure they 'feel right'.

Likelihood (& Proximity) Scoring (use most

severe)

1. Unlikely/Distant

(& Proximity) 2. Possible/Long-term

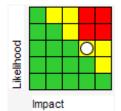

3. Likely/Medium-term

4. Expected/Short-term

5. Certain/Imminent

Little evidence that risk is likely to occur, or likely in over 5 years Fairly low chance of risk occurring, or likely in next 3-5 years Reasonable chance of risk occurring, or likely in next 2-3 years

Strong chance risk will occur, already partly occurring, or likely in next year Fairly evident that risk will occur in next quarter, or has already occurred

The **overall risk score** is likelihood multiplied by impact. Here, likelihood = 3 and impact = 4, so the rating is $3 \times 4 = 12$ and the status is amber. The highest possible rating is $5 \times 5 = 25$.

We must focus on **significant risks**, so there's often more ambers and reds. If green, consider whether it's substantial enough to include (unless we need to **demonstrate** how it's being managed). **Inherent** score shows severity with no controls. **Residual** score includes existing controls/mitigations. **Target** score includes controls and the influence of future actions.

5. Risk Control

Once the risk has been evaluated, existing **Internal Controls** should be assessed. These may be strategies, policies, procedures, processes, arrangements, scrutiny bodies, etc. that mitigate the risk to some extent by reducing either the likelihood of it occurring or the impact if it does occur. We're often only able to influence one or other of these factors but in some cases controls influence both likelihood and impact. As well as existing controls, there may be planned **actions** (new/planned/in progress) that will reduce the risk once implemented. For example:

- Harm to individuals' health & wellbeing the impact of this could be significant and irreversible in many different respects so our efforts usually focus more on **preventative** actions and controls;
- Loss of public utilities (power, water, etc.) here, the cause is outwith our control so the actual risk is failure to prepare or promote resilience, and we can only look at planning to limit the **consequences** when it occurs;
- Health pandemic, Climate change or Strike action in these situations we can look both at preventative
 actions to reduce the likelihood but also use Business Continuity Plans to reduce the impact.

Once controls and actions are identified, the risk should be assigned an **owner** who can make decisions on **treatment options**, and the **approach** to use. It's important to be risk **aware**, or we could miss opportunities or threats – our Risk Appetite Statement provides guidance on areas of high/low risk tolerance. Though the identified owner is not final (risks can be escalated and demoted), it's important that they have an appropriate **remit**, **resources and authority** to manage the risk and ensure that treatment actions are completed, where appropriate.

There are 4 different **Approaches** that can be used to manage risks:

Treat - take action to reduce the likelihood or impact (most common approach – may treat then tolerate);

Transfer - pass the risk to another party, such as through insurance (however, some duties non-transferable);

Terminate - cease the activity that is causing the risk, or do not complete proposed activities; - continue monitoring once reasonable actions within our control are complete.

Examples where risk appetite and prioritisation must be used:

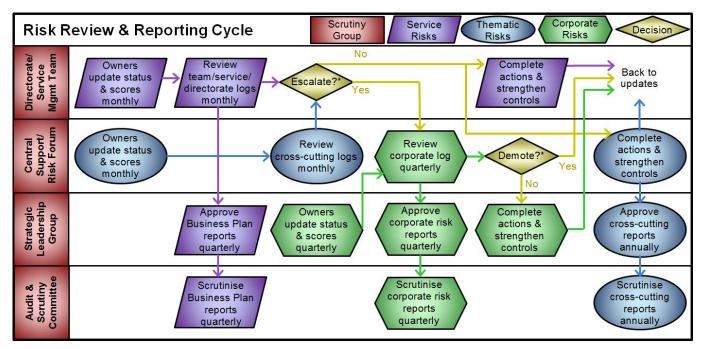

Financial management
Legislative changes
Statutory vs preventative
Procurement
Balancing rights
Satisfaction vs efficiency

Focus on short term efficiency savings or 'spend to save' investment for the future? Resource for training/process/system changes versus cost of statutory breach? Minimum statutory requirements/checks or augmented for early identification? Balance/prioritise best functionality, maintenance, support, customisation, price, etc.? Protecting the rights of individuals, or community benefits, or both?

Satisfaction vs efficiency Offer range of options to customers or channel shift to the cheapest option for us?

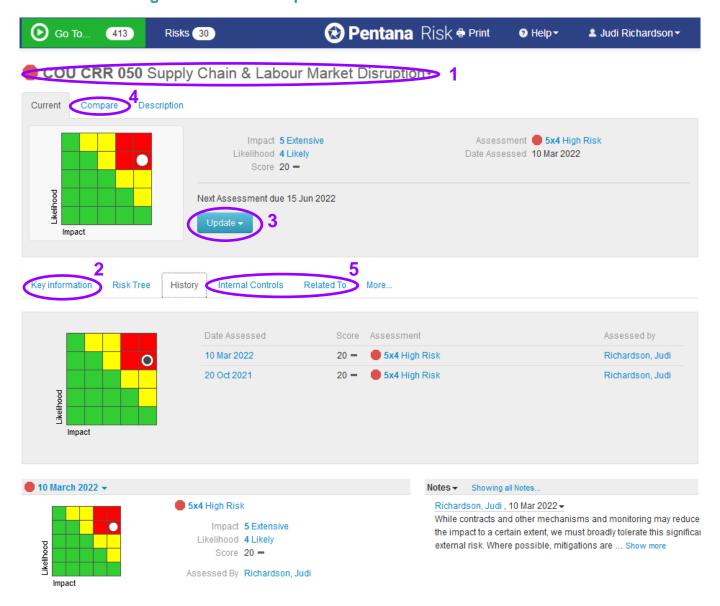

6. Risk Scrutiny

The review and reporting cycle is shown below. Risk logs should be reviewed frequently and the hierarchy used to escalate and demote. This may depend on the owner's ability to manage the risk, or if the nature or understanding of the risk changes. The Risk Management Strategy provides information on responsibilities and governance.

*Does the risk have a corporate impact? Does it affect multiple services? Does it require consistent management across the Council? Is it significant (red) for an individual service? Does the owner lack the authority or resources to manage the risk? If yes, consider escalating to a higher-level log (from team to service, or service to corporate).

7. Risk Recording - Pentana Risk Updates

- Click to edit Title (short as possible what could go wrong as well as the area) and Description (more detailed, include Cause & Event***). Don't edit the code or de-activate/delete other checks/approval may be needed.
- 2. Click to edit Potential Impact (Profile) refer to the impact categories (Financial, Security, Wellbeing, etc.)***. Check Approach if 'Treat' must have related Actions, if 'Tolerate' must have Controls (see step 5). Check Owners in Key Information. Don't edit owners may need approval, will affect email notifications & reporting.
- 3. It can be useful to copy the previous note (bottom right of screen shot), before clicking Update/New Assessment, then edit Scores (guidance appears on right) and type/paste/edit Note. If recommending deactivating or moving to another risk log, state this in the note, and why***
- 4. Click to edit Inherent Score (excluding Actions/Controls) and Target Score ('tolerance' what it would need to reduce to before we would de-activate). Keep it sensible if we're 'treating', must be lower than current score!
- 5. Click to view Actions (still to be done) or Controls (already in place) stay focussed, maximum 3 of each. Click header then Add to select from list (Business Plan, LOIP, other plans/strategies/processes, etc.), or Remove.

 Don't click Create or New should be set up consistently by Superusers. This is the final step thank you!

***See other sections of Corporate Risk Management Guidance

Check with site administrators or service Superusers about red notes above (changing codes/owners/targets, closing a risk, or if you can't find required actions or controls) – these elements need additional checks or to be done in a managed way (e.g. reporting that a risk is going to be closed before doing so).

8. Governance Checklist

This section details the minimum requirements, documents and duties expected of staff and managers within Clackmannanshire Council. This demonstrates how the risk management policy and principles apply in specific operational contexts by providing information on relevant controls in specific risk-related areas. This summary will be revised annually, alongside the Risk Appetite Statement and Delivery Plan.

Annual Planning & Assessments	Group	Frequency	Category
Review & update Business Continuity Plans/Impact Assessments	Managers	Annual	Continuity
Complete Induction and Performance Review & Development process	All staff	Once/Annual	Cultural

Appendix C – Corporate Risk Management Strategy Delivery Plan

Following strategy approval this plan will be imported into the Pentana Corporate Performance Management System for ongoing management, monitoring and reporting.

Strategy Performance Indicators demonstrate the deployment & success of the Corporate Risk Management Strategy. Amber to be added as actions progress.

Aim/Theme	Indicators (all codes begin P&P CRM)	Details (reported to Forum quarterly/Audit & Scrutiny Committee annually)
l oodorobin/	LM1 Senior managers with Enterprise Risk Management accreditation	19/20 = 54%, 20/21 = 48%, 21/22 = 46%, 22/23 = 32% (reduction due to turnover)
Leadership/ Awareness	LM2 Elected Members who have attended risk/scrutiny training	Out of 18, currently 33% (Audit & Scrutiny Committee), to be rolled out wider
Awareness	LM3 Senior managers with up to date portfolio risk log on Pentana	Out of 32, 'up to date' = reviewed within last year (when action LM2 complete)
Ctrotom/	SP1 AGS senior managers' rating of whether approach implemented	See note under Processes/Clarity below
Strategy/ Transparency	SP2 Key corporate strategies that include reporting of risk register	Relevant strategies to be identified (when action SP4 complete)
Тапорагенсу	SP3 Key projects/programmes that include reporting of risk register	Relevant projects/programmes to be identified (when action SP5 complete)
People/	PE1 Service areas adequately represented on Corporate Risk Forum	Out of 25 (relevant areas to be confirmed by SLG)
Consistency	PE2 Service areas adequately represented by Pentana Superusers	Out of 25
Collaboration/ Partnerships	To be developed with Health & Social Care Risk Forum, Local Resilience Partnership and other partnerships/project boards	Partnership work is currently more action-based and indicators will only be put in place if felt to be meaningful & useful
Processes/	PR1 AGS senior managers' rating of whether approach is meaningful	Risk currently grouped with 2 other approaches in AGS (Strategy & Performance
Clarity	PR2 AGS senior managers' rating of whether approach is accessible	Management) – to be added/amended when AGS action complete (HA1)
Assurance/	HA1 Internal Audit opinion on risk management, governance & control	No/Limited/Substantial assurance level
Proportionality	HA2 Insurance contract 'risk control days' allocated	12 days per year to address key priorities – training or strategy/policy reviews
Outcomes/	OD1 Key corporate performance indicators improving	Local Covernment Developmenting Francoverts (404 masses and 8 additional
LODIECHVIIV	OD2 Key corporate performance indicators meeting targets	Local Government Benchmarking Framework (104 measures) & additional indicators from the Local Outcomes Improvement Plan, when revised
	OD3 Average ranking for benchmarked corporate indicators	indicators from the Local Outcomes improvement rian, when revised

Category Indicators demonstrate the management of wider risk categories below the level of the Corporate Log, used in 'horizon scanning' for emerging risks.

To be reported annually/quarterly to Corporate Risk & Integrity Forum (and the Extended Strategic Leadership Group and Elected Members in risk/LGBF/strategy reports). To reduce duplicate reporting, these will be provided as high-level summaries and exceptions. For example, based on the suite of Health & Safety/Climate Change Strategy indicators, the proportion improving and additional detail on those with a red status in relation to target-achievement. A balance will be sought in terms of internal preventative measures (such as training completion) and on external outcome-focussed measures on the wider effectiveness of risk management approaches. This will provide a lower-level segmentation of the Outcomes measures above, with indicators grouped by the strategy categories.

Risk Indicators demonstrate the likelihood/proximity of corporate risks & the impact of mitigations (to be piloted with the corporate risk register).

In order to minimise some elements of subjectivity, and to support evidence-based decision-making, indicators will be identified to inform corporate risk assessments. Similarly to the above, this will take the form of a higher-level summary but will focus on specific risks, rather than wider monitoring and awareness of the internal and external business environment. For example, the risk regarding Financial Resilience will be informed by performance across the 5 Financial Sustainability indicators in the Local Government Benchmarking Framework. In some cases, 'hard' quantifiables may not be available, in which case a quasi-indicator may be utilised, such as the UK terror threat level informing the Extremism risk score. Similarly, yes/no indicators may be of most benefit in some areas, such as the risk regarding Systems Failure being informed by whether Public Services Network compliance/Cyber Essential accreditation has been achieved.

<u> </u>				Risk Handling & Assurance; Proportionality			Current Score	20	Target Score 8	
Risk	Failure of governance/scrutiny leads to over-/under-control of risks, with lack of balance in appetite, tolerance & control.									
Potential Impact	Missed opportunities, allowing unfavourable events to occur, or prevention activities causing greater impact than would be incurred should risks materialise, resulting in inappropriate utilisation of workforce, financial resources or other asset								8	
Note	Local Code assessed via AGS & audit/insperemits & approval ensure oversight. Special identifying 'risk control day' priorities. Nation	lists sù _l	pport staff, s	haring information via forum to ensure bal	lance, a		Likelihood	Impact

P&P CRM PR1	Define Governance Checklist key controls & Appetite Statement to support prioritisation (annually)	Clarity	P&I Adviser (Risk Forum)
P&P CRM OD1	Pilot reporting of performance indicators for corporate risks to demonstrate likelihood/proximity/impact	Objectivity	Forum (P&I Adviser)
P&P CRM OD2	Identify category measures for broader forum monitoring/horizon scans (LGBF, SIMD, census, etc.)	Objectivity	P&I Adviser (Risk Forum)

Reactive and Future Actions

Ongoing/cyclical/reactive actions include:

- Responding to service risk/performance/Pentana requests/queries and providing support for service Superusers (Processes);
- Participating in the biennial review of the Community Risk Register & lessons learned debriefs, led by the Scottish Fire & Rescue Service (Processes);
- Work with the Data & Digital Transformation Team to improve access, use and impact of tools & mechanisms for informing risk assessments (Processes);
- Work with the Capital Transformation Manager (once appointed) to develop project dashboards and minimum project governance requirements (Clarity);
- Providing evidence for the Annual Governance Statement, Internal & External Audit (Assurance); and
- Participating in the Local Government Data Platform project to consolidate/streamline statutory data returns (Proportionality).

Actions for future years (2024/25 onwards) will focus on:

- Initiating a programme of risk log development through identifying & prioritising gaps in risk assessments across services/teams (Leadership), strategies/projects (Strategy), partnership activities (Partnerships), and cross-cutting corporate themes/categories (Processes);
- Reviewing Pentana Internal Controls list (strategies/governance arrangements/mitigations), locating documents and ensuring accessible to staff (Strategy);
- Assessing potential for 'deep dive' committee reporting to explore selected risk(s) in greater detail (Transparency);
- Giving Elected Members and External Auditors access to Pentana, once confident that records are comprehensive/accurate/being updated (Transparency);
- Further development of the Council/committee report approval process, ensuring timely consultation with key risk experts on decisions (Transparency)
- Assessing options for senior manager refresher training after accreditation gained (such as via Leadership Development Programme (People);
- Summarising common risks & mitigations in a risk library/menu to simplify the assessment process and capitalise on past successes (Proportionality);
- Improving integration of risk with the Annual Governance Statement process (Assurance) and the development and delivery of major strategies (Outcomes);
- Complement risk assessments with benefits evaluation (inverted matrix) to provide a rounded summary and shift focus to delivery of objectives (Outcomes); and
- Incorporate identification of informative performance indicators into risk evaluation (if year 1 pilot with corporate risks proves useful/practical (Objectivity).

Appendix D – Corporate Risk & Integrity **Forum Terms of Reference**

Purpose: Reducing the Council's overall risk profile by sharing information and proactively managing

existing and emerging concerns in an efficient, effective, timely and integrated manner.

Remit: Providing a governance mechanism for monitoring the fulfilment of statutory duties and

policy commitments, discussing strategic and operational progress, and prioritising actions to

minimise potential barriers, ensuring the best possible outcomes are achieved.

Governance: The Forum provides assurance to the Strategic Leadership Group on the robustness of

> policies and processes in key risk-related areas, escalating concerns and compliance issues. Attendance is targeted at a relatively senior level and to those who chair/co-ordinate/attend other thematic governance groups to ensure visibility and facilitate information exchange.

Aim: To ensure risk owners and senior management are held collectively accountable for the

completion of remedial mitigations that support continuous improvement and Best Value.

The specific tasks completed by Forum members are:

Participating in high-level risk reviews, contributing knowledge and identifying new risks via horizon scanning;

Feeding back on corporate risk strategy, policy & processes, and opportunities for streamlining/consolidation;

Providing updates on their own corporate risks, and peer-reviewing others' for consistency and integration;

Providing more detailed internal updates on their respective risks/service areas, including: Significant recent incidents; Recent achievements/progress; New developments/legislation; Key risks & required actions.

Signposting guidance, support and development opportunities, including agreeing the annual allocation of (insurance contract) risk control days for strategy review and/or training provision;

Monitoring the completion of mandatory training and policy adherence across services;

Communicating and raising awareness of concerns and compliance issues, including prioritising their escalation to the Strategic Leadership Group for maximum impact and benefit.

Chair: The Forum is chaired by the Strategic Director – Partnership & Performance, as owner of the

Corporate Risk Management approach. The Director presents an update and issues for escalation to the Strategic Leadership Group after each Forum meeting, and provides reciprocal feedback to the Forum regarding issues of strategic direction and governance.

Membership: Forum attendance is adjusted to reflect the organisation's risk profile, in order to flexibly address the most significant concerns at any given time, with current representatives from:

> Partnership & Performance Directorate – Finance & Revenues (including Procurement): HR & Workforce Development (including Health & Safety); Legal & Governance (including Monitoring Officer, Information Management & Internal Audit); and Partnership & Transformation (including Civil Contingencies (link to Local Resilience Partnership). Counter-terrorism, Digital & Data, Equalities & Serious Organised Crime);

People Directorate – Chief Education & Social Work Officers;

Place Directorate - Strategic Director; Energy, Sustainability & Climate; and Housing;

Clacks & Stirling Health & Social Care Partnership (Locality Manager & Head of Service);

Clackmannanshire Alliance Community Planning Partnership (board includes 2 Directors

& 1 Senior Manager listed above).

Timing: The Forum is held quarterly, in advance of formally reviewing the corporate risk register, to

> ensure discussions inform updates. The Forum meets at the end of May, Aug, Nov & Feb. Updates (item 2 below) are requested a month before the meeting and distributed a week

before. Corporate risk review deadlines are the 15th of the following month.

Agenda: 1. Welcome and Introductions Strategic Director – P&P (Chair)

> 2. Review of Detailed Risk/Service Updates Forum members submit/present quarterly Owners provide updates/others challenge

3. Verbal updates on Corporate Risk Log All with issues to escalate to SLG

4. Prioritisation of Issues for Escalation

5. Any Other Business

To ensure focus and limit workload/meeting/document length, item 2 updates should not exceed 1 page. To similarly promote focus and action, no detailed minute is recorded but an action log will be created to drive progress, following strategy approval.
